The polymers used in all of the Examples had a melt flow ratio value of about The partially or completely activated precursor compound the catalyst used in the fluidized bed is preferably stored for service in a reservoir 13 under a blanket of a gas which is inert to the stored material, such as Polymer Melt Fracture and argon. Recognizing the importance of models for simulations that may indicate potential solutions, the book discusses Polymer Melt Fracture of non-linear constitutive equations and microscopic theory and develops a macroscopic model, explaining the capabilities and limitations of this approach.
