Methodology used for carbon footprint calculations in the tool Climate account. This seems to call for a thorough understanding of latent behavior potentials of local populations, suggesting that affordance-based governance should be polycentric or decentralized inclusive and participatory, reducing local helplessness and increasing social acceptability.

Citing examples from Australia, Canada, Chile, France, Israel, Japan, Korea

We can walk to the shops, to the day-care centre, just walk, walk, walk. Introduction Global warming has been a focus of policy and research attention for some time.

Consumption-related themes: concepts of "needs", status and utility; challenges implementing climate change mitigation in their own domains, local governments have the potential to become role models for other local actors, e.
